INTRODUCTION

Established over 20 years ago, Festival Glass is an award winning glassware screen printing company based in West Yorkshire delivering bespoke branded glassware to the UK drinks industry.

As a family run company we welcome the opportunity to help businesses, big and small, achieve a point of difference in the on and off trade through their glassware.

Our dedicated team understand the importance of attention to detail, as well as your brands first impression. Taking a flexible, friendly and hands-on approach, our passion is creating bespoke printed drinking glassware. We take great pride to be involved in providing a unique platform to promote your brand.

Throughout our 20 years of business we have invested heavily in new technologies to ensure we are consistently providing our valued customers with the best quality possible. We have long standing relationships with multiple glassware manufacturers to provide our customers with a varied range of both trending and traditional glass options.

Festival Glass are also able to self-verify CE & UKCA stamps and lines, ensuring they comply with The Measuring Instruments Directive (MID) and UK Weights & Measures Act.

FAQ'S

What is the minimum order quantity?
The minimum order varies throughout the range, but core items start at 576 units for single colour and 1200 units for wrap designs and multi-colour print.

What are your lead times?
Our current lead times are 4-6 weeks for single colour print and 8-10 weeks for multi colour. Please be aware lead times are subject to change and are dependent on both production and stock availability.

What are your price breaks?
Price breaks sit at the following quantities: 576, 1200, 2400 & 5000 units. For orders larger than 5000 units, please get in touch to discuss pricing options.

What is toughened glass?
Fully toughened glassware has been strengthened throughout the body of the glass to improve the glass' resilience to impacts and stress. Upon the event of breaking, the entire body of the glass is designed to create a shockwave, creating a series of tiny spider web like fractures throughout the entire glass. This results in smaller fragments of glass, helping to minimise the risk of injury.

What is the maximum number of colours you are able to print?
We offer a multi-colour printing service that can print up to five colours.

Can you offer gold rims on your glassware?
Unfortunately, we are unable to offer this option.

Can you print with metallic colours?
We are able to offer a metallic gold option at an additional cost, due to the precious metals within the paint. Price and availability depend on glass shape and design, please contact the Sales Team to discuss in more detail.

What is etch effect & can you offer this?
Etch effect often falls under the category satin etch, laser etch or etch effect and remains a timeless classic still today. The impressive etch effect is achieved by the application of a special paint used within the printing process. Once the decorated glassware is complete it possesses a matte finish, similar to what is achieved through traditional engraving.

Are you able to offer wrap designs on your glassware range?
Many of our glasses have the option to include a wrap design. Please check individual product details or contact the Sales Team to check whether this is possible on your preferred choice and for artwork templates.

Is there a price difference between a single badge position & a wrap design?
Yes, there are different price points based on the coverage of the glass. Glasses which have the wrap option available also have relevant spec sheets to show the maximum print area.
